## **DEFINITIONS AND SPECIAL INSTRUCTIONS**

Month	Number of weeks in period	Period covered
January	4	January 4, 2004 -- January 31, 2004
February	4	February 1 — February 28
March	5	February 29 — April 3
April	4	April 4 — May 1
May	4	May 2 — May 29
June	5	May 30 — July 3
July	4	July 4 — July 31
August	4	August 1 — August 28
September	5	August 29 — October 2
October	4	October 3 — October 30
November	4	October 31 — November 27
December	5	November 28 — January 1, 2005

### **1. Scope of survey**

This survey covers all manufacturing plants consuming cotton, manmade fiber staple, and raw linters except as follows: (1) consumption of uncut top and other longer fibers on the "American" and other new systems for spinning uncut top, (2) establishments spinning cotton and manmade fiber staple on woolen or worsted machinery (report on Census Form MQ313D, "Consumption of Fibers in Woolen Spinning and Production of Tops and Noils.").

### **2. Figures to be reported**

Companies with more than one establishment consuming the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact shown on the report form or write to the U.S. Census Bureau for additional forms.

#### **a. Consumption of materials**

Your figures should include --

Material passed through the opener or otherwise removed from inventory and put into process for carding, spinning, bleaching, etc., including all linter cuts, hull fiber, delint, and oil mill motes.

*but exclude --*

Consumption of cotton and textile waste and all other waste materials, such as gin motes

#### **b. Stocks of materials**

Report the inventory of materials located in your mill, mill warehouse, or in any private storage place which you *own* or lease as of the close of business on the last day of the report period.

Your figures should include --

Raw linters, hull fiber, delint, and oil mill motes in bale form

Stocks in these locations regardless of ownership of the material

Stockpile cotton released by the General Services Administration

*but exclude --*

In-process material such as roving, batts, felts, bleached raw stock, etc.

Material stored in public warehouses or at other manufacturing plants. (These materials will be reported by the warehouse or at the other manufacturing plants.)

Battings and pads made from linters by others. Also, do not include linters pulp and gin motes.

**c. Spindle and rotor hours**

Enter the total spindle and/or rotor hours operated during the period of each fiber classification.

**d. Units of measure**

Report in the unit of measure specified for each item. Where thousands of pounds are requested for domestic and foreign cotton consumption and stocks, report on net trading weight basis. Convert foreign cotton to 500 lb. equivalent gross weight bales by dividing the total weight including baling materials by 500, or the net weight of the cotton excluding baling materials by 480.

Report raw linters consumption and stocks in running bales and thousands of pounds.

**3. Definitions**

Spindles and rotors — The term "cotton-system spinning spindles" does not include spindles operated on the "American" and other new systems for spinning uncut top. It does, however, include rotors operating (open-end spinning). The total number of cotton-system spindles and/or rotors should be reported whether or not such machines are used on cotton. For active spindles and/or rotors, report the number active for the shift during which the largest number of spindles and/or rotors operated on the last day of the period, showing separately the number active for each fiber classification.

**4. Special inquiry for July 2004**

A supplemental inquiry will be included with your July report. Please use all the above definitions when completing this inquiry.
